

NEO SHUFFLEBOARD TABLE

Continually inspired by Art Deco and the ornate detailing of the period, Woolsey designed the Neo Shuffleboard Table to showcase his studios continual pursuit of craftsmanship and excellence in design.

Obsessed with details, Sean Woolsey Studio miter wraps each leg with consistent grain, while showcasing a V groove detail throughout the leg. Each leg perfectly sleeves into the steel base and has a leveler for adjustment.

We chose Quarter Sawn White Oak for this series (we also offer black walnut and rock maple) to showcase the natural and opulent grain features natural in this timber. Finished in either our in house clear coat or blackened white oak + clear coat.

The Neo Shuffleboard features a solid rock maple top, with a UV resistant epoxy resin topcoat that is ready for years of puck sliding gameplay. Black walnut is meticulously inlayed as the lines and the numbers on the plank .

Multiple gutter linings are available. Climatic adjusters level out the plank during changes in the weather.

Comes with a set of Woolsey professional black and white pucks, a wall rack (to hold the pucks), and plenty of salt.
